COURSE CREDIT: Qualifies as either a PE credit (9th grade only) or an Elective credit

COURSE DESCRIPTION: AS: *A Journey into Aviation History*
LE: *Principles of Management*
W: *Wellness/Physical Education*

This course is comprised of Aerospace Science, Leadership Education and Wellness. The **Aerospace Science** portion of the course is an aviation history course focusing on the development of flight throughout the centuries. It starts with ancient civilizations, then progresses through time to modern day. The emphasis is on civilian and military contributions to aviation; the development, modernization, and transformation of the Air Force; and a brief astronomical and space exploration history. **Leadership education** is an integral part of the instruction. The course exposes students to the fundamental principles of management. The course contains many leadership topics that will benefit students as well as provide them with some of the necessary skills needed to put into practice what they have learned during their time in AFJROTC. This course is designed to equip cadets with the qualities needed to serve in leadership positions within the corps and after high school. Throughout the lessons are many ethical dilemmas, case studies, and role play activities built into the lessons. These activities are based on real life experiences and will allow students the opportunity to practice what they learn by getting involved in discussions and expressing their opinions. The **Drill and Ceremonies** course is integrated in this course as part of Leadership Education. Cadets are provided fundamental and in-depth instruction in Air Force drill and ceremonies. **Wellness** is an official part of the Air Force Junior ROTC program. It is an exercise program focused upon individual base line improvements with the goal of achieving a national standard as calculated with age and gender.
