

Not Your Mama's Research Project...

You will come away with a variety of technological resources available to you and your students to create a project other than using PowerPoint presentations. Google Apps, Web 2.0 tools as well as Microsoft products will be shown.

Timelines	https://www.timetoast.com	Timetoast is a place to make timelines on the web. Use it to create historical timelines of important events. It's up to you and your imagination.
	http://www.tiki-toki.com/	Another timeline that lets you be a little more creative. Can also be found on Google Apps in Google Store.
Presentations	http://prezi.com/	Prezi's zooming canvas opens up the classroom to active learning and interactivity, making lessons understandable, memorable, and fun
	https://www.zoho.com	Zoho Show is an online tool for making powerful presentations. It allows users to share & collaborate on presentations and make remote presentations to clients. Available as a Google App from Google store.
	Movie Maker through windows	Makes movies with photos, video clips, text, voice and it can be set to music. Available on the Dell computers under all programs. If not there it can be downloaded free.
Storytelling	Photostory	Creates slideshows using digital photos. Can add voice, music titles and captions. If only using photos it's easier than moviemaker.
	https://narrable.com	Narrable is a storytelling platform for students to share what they learn in class and experience in life. Available as a Google App from Google store.
Storytelling with quiz option	www.metta.io	Nothing holds attention like a great video lessons. Metta combines its multimedia storytelling tool with a powerful quiz/poll editor. Available as a Google App from Google store.
